Science-Read and complete "What is snow?"
article and make a snowflake

Name _____

Serving Others

Use the empty space to draw or write about how you can love and serve other people.

I can use my hands.

I can use my feet.

I can use my voice.

Down to Earth

Add or subtract.
Write the sign.

12 kids were at the space center.
6 had to leave.
How many were still waiting?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ kids}$$

12 lights were on.
2 lights went out.
How many lights were still on?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ lights}$$

5 space robots were built.
6 more were built.
How many robots were built in all?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ robots}$$

There were **12** telescopes.
7 were being used.
How many were not being used?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ telescopes}$$

Moon Mouse got **7** moon rocks.
She got **6** more.
How many moon rocks did she get in all?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ rocks}$$

Moon Mouse waved to **6** friends.
She waved to **6** more.
How many friends did she wave to in all?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ friends}$$

Name _____

Read the story.

Let's learn how to mix paint. You can make a new color. Get a small dish. Put some yellow paint in the dish. Add a little bit of blue paint. Now stir to mix the new color. You made green paint.

Read the sentences in the box below. Write them in order as they happened in the story.

1

2

3

4

5

Put the yellow paint in the dish.
Stir the paint.
Look at the green paint.
Get a dish.
Add some blue paint.

Draw a line under the best ending for the story.

- You can eat lunch.
- You can paint a tree.
- You have three new colors.

Name: _____

What is snow?

When water heats up, it turns to gas. The gas rises in the sky and forms clouds. The water in the clouds can get so cold that tiny ice crystals form. When the crystals get so heavy, they can fall to the ground. If the ice crystals fall through warm air, raindrops form. If the crystals fall through cold air, snowflakes form. There are six different types of snowflakes.

1. Why do ice crystals fall to the ground?

Follow the directions on the next page and try making a snowflake. Make sure to bring it to school so we can compare our snowflakes.

What is Snow?

weather science

Fold a square in half

Fold rectangle up as shown

Cut as you like!

Make your own snowflake!

Now that you've learned all about snow, follow these easy instructions to make your own snowflake.
